

TexPrint® R

Exclusively for **RICOH** High-Speed Sublimation Printers

TexPrint® R is a new “special purpose” dye sublimation paper that puts the blazing speed of the new RICOH GX series printers to full use. TexPrint® R does this while maintaining the premium definition and color fidelity for which the TexPrint® family of sublimation papers is renowned.

TexPrint® R delivers:

- Excellent dimensional stability at high speeds and heavy ink loads
- Exceptional resistance to smudging and offsetting.
- Directional out-gassing (dye-gasses aimed at the receptor with no back gassing)
- Very high color transfer efficiency.

As with all the rest of the TexPrint® family, TexPrint® R is 100% recyclable!

This leading edge technology works with RICOH models GX3300, GX 5550 and GX 7000.

Available in:

- 110 pack sheet sizes
- 8.5” x 11”
- 8.5” x 14”
- 11” x 17”
- 13” x 19”
